A Brief Introduction

Volt Technologies is a complete IT solution provider including IT Education, Software, website development, BPO Softskills and other training solutions, IT Infrastructure and Hardware setup, IT manpower outsourcing and IT Consultancy. It is founded by the Ex Employees of India's leading companies like WIPRO, SATYAM and HCL who resigned from their prestigious jobs and started this firm. We have fresh ideas, we create innovative business planning and we design effective solutions. Hence within a couple of months from its establishment it has so many satisfied government and private clients and many happy students who enrolled training here.

Volt Cyber Lab also known as "V-Labs" is a forensic and R&D division of Volt Technologies which has expertise in collecting, analyzing and investigation of digital evidence and cyber trails. This digital evidence and cyber trail may be found in computer hard disks, cell phones, CDs, DVDs, pen drive, somewhere in laptop/Computer hard disks, floppies, computer networks, the Internet etc. and in form of hidden in pictures, encrypted files, password protected files, deleted files, formatted hard disks, deleted emails, chat transcripts etc.

If you are a business venture just started out or a more mature and stable organization looking for strategic IT services, we have all the solutions to match your needs. Started initially with being a computer training organization, we have leveled up with our sincere hard work and dedication to being one of the top and leading IT solutions provider, primarily focused on providing online services, customized business software and hardware maintenance and support.

We specialize in web development of multifunctional information systems, related to creation of website design according to the company's needs.
It is a debt – free and profitable privately held firm which has been successfully serving the market since its establishment.

To add a feather to our crown, we have to our credit more than 100 satisfied clients whom we have successfully served in a short span of only two years since our venture into this field.

Company Introduction

Registration Details

Volt Technologies has been necessarily registered with different units as and when required for a leading IT company. The existence of the company is based on its registration with the Govt. of Jharkhand (Co. Registration No. – 200142100753/2011). The company is also ISO 9001:2008 Certified.
